Subject: Update on HandyDART RFP

This notice is to update potential bidders to the Custom Transit - HandyDART Request for Proposal (RFP) to provide custom transit services in the Metro Vancouver region.

As you may be aware, TransLink has transitioned to a new governance model with a new Board and enhanced responsibilities. As such, a further extension to the release of the RFP is needed to fully appraise the Board of the objectives of the RFP and the consultations that have occurred. This is needed given the Board's expanded role with respect to customer service.

A further update will be provided once this has completed.
