

Board Director Marshal Nickel - Quality of Life Solution Recipient

We were delighted to hear that GVCSS Board Director Marshal Nickel is the recipient of a Quality of Life solution grant from the 2007 Rick Hansen Wheels in Motion, a fundraising initiative which helps individuals with spinal cord injuries to live more independently. Wheels in Motion 2007 raised enough funds to support eight Quality of Life solutions here in Vancouver. One of these awards supported modifications to a new van that Marshal is able to drive and operate independently. The new converted van replaces the old van he had which had become outdated, unreliable, and required frequent repairs. Now that his van conversion is complete and is reliable, he is looking forward to visiting family and friends across the province, doing errands and taking part in outings including volunteer activities autonomously. Congratulations Marshal!
